Week 2 – Team and PM

 [mycookiebook](#)  [11. Oct 2020](#)  [Allgemein](#)  [Edit](#)

Hi Cookies,

this week we had to define our team roles and responsibilities using the RUP terminology. You can check it out in our menu bar 'TEAM' above.

We set up our first sprint with the different tasks on YouTrack where we can see and work with them.

We also created a GitHub repository to track the source code for our project. Both tools are linked on our menu bar.

This week we also discussed about the technology which we want to use for our project and chose the following ones:

Backend: Java, Python

Frontend: Angular, CSS, HTML, Java, SpringBoot

Database: MySQL, MongoDB

Testing: JUnit/Mockito

These are technologies where we all have a basic know-how and some experience. Perhaps our technologies will change in the following weeks because we may figure out that other technologies might be more useful.

We hope to see you next week,

your CookieBook-Team

Ahoi folks,

we (Team Vaultionizer) really liked your short but very informative blog. It is written quite well but we have some point we want to criticize:

- GitHub and YouTrack are not present in the menu bar. We would prefer a direct link to the tools or the the menu-page “technologies”.
- Before listing you technologies you speak about “technology” and afterwards change to the plural

“technologies”. For the sake of consistency a change would be nice.

– “we had to define our team roles” sounds like you were forced to do that. Even if that would be true it doesn’t sound professional

– please don’t use abbreviations for the team member names, it makes things a little bit confusing

All in all we enjoyed your blog and wish you all the best for the future!

Kind regards,

Team Vaultionizer

Hello Team Vaultionizer,

thank you for your interest and feedback on and about our blog.

Sorry for the confusion regarding the link in the menu bar. Originally, we linked directly to GitHub and YouTrack, but we wanted to make the other technologies accessible as well, so we reworked the format.

We are also very sorry, if the impression was created that this blog entry was a ‘must’. It’s only elementary for every good project to clearly define responsibilities and contact persons at an early stage. That’s why it was a pressing need for us to do this this week.

To your last point: Even though we like to share our progress around CookieBook with you, our cookies, we want to keep our anonymity as high as possible. We have therefore deliberately decided not to give the full names. Our aim is rather to give you an idea of the relationship between the areas of responsibility, not to assign people directly. We hope you can understand our intention.

Have a nice day,
your CookieBook-Team
