Week 8 – Class Diagram

 [mycookiebook](#)  [22. Nov 2020](#)  [Allgemein](#)  [Edit](#)

Hey Cookies,

hopefully, you are doing well.

This week we want to present you our application structure. We showed you our database setup two weeks ago. However, as a reminder, we have linked it to you again **here**.

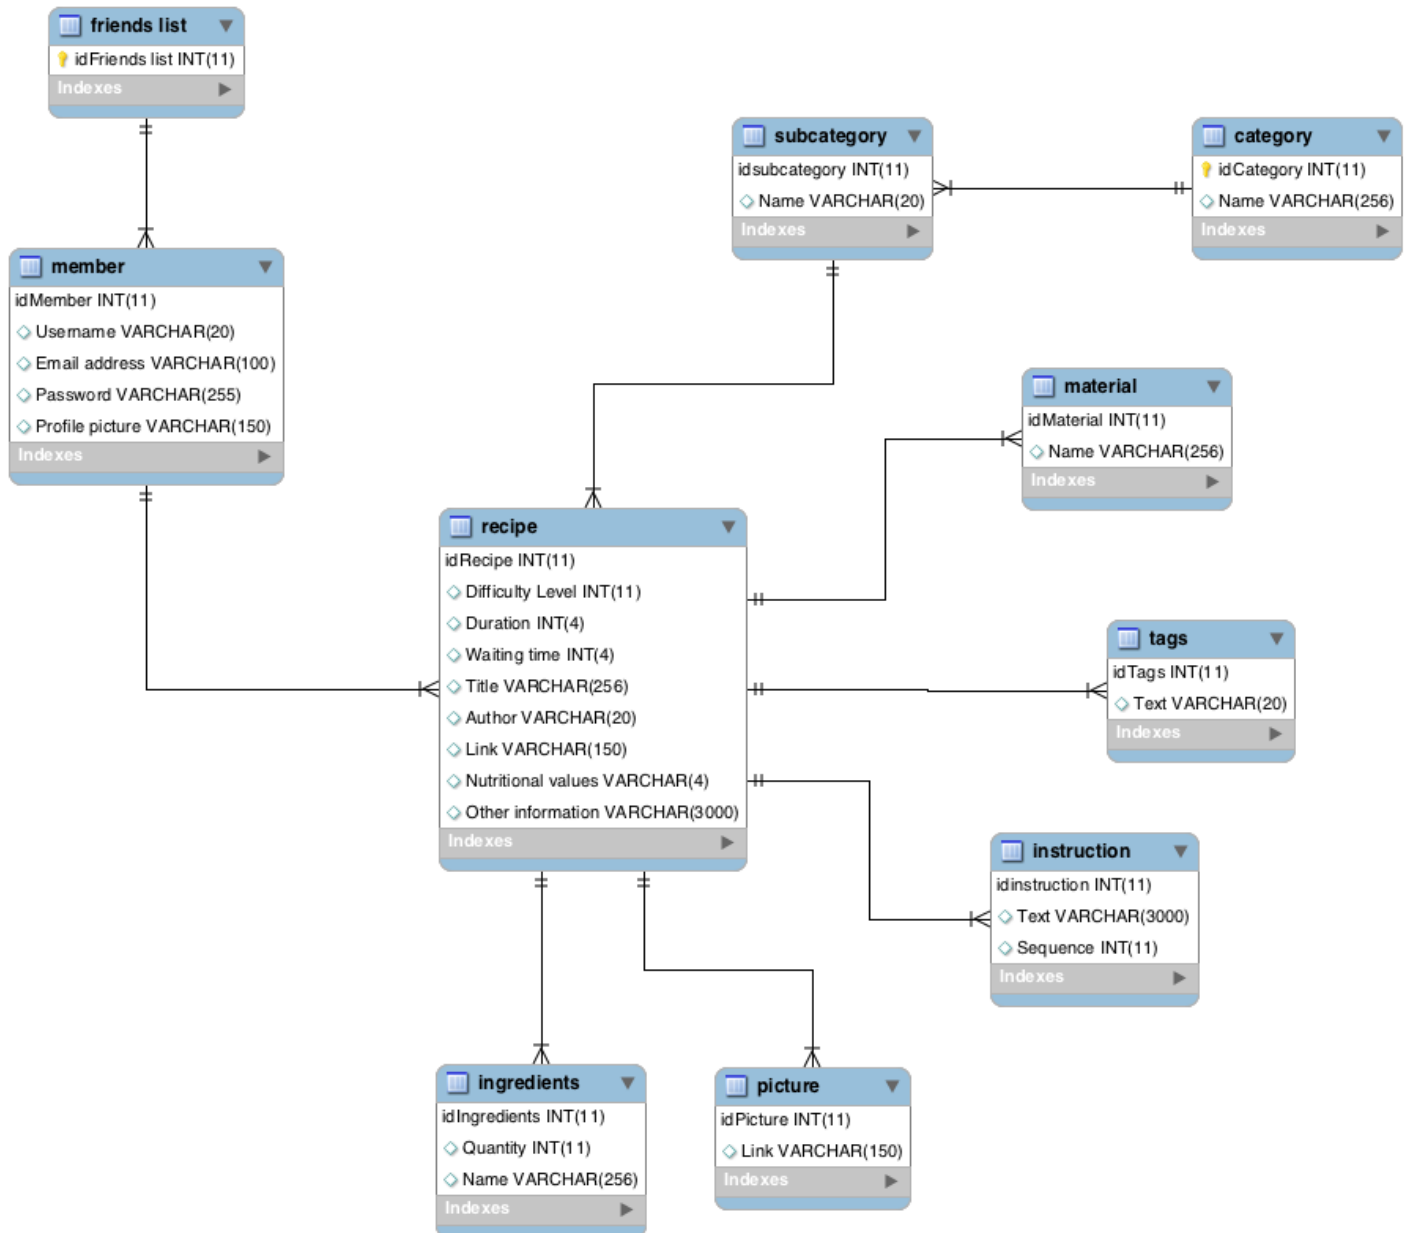

Furthermore, our JetBrains' IntelliJ IDE offers the possibility to create a class diagram automatically. So it will grow and develop together with our website. In the picture below you can see the current version.

Class diagram

You can take a closer look at our **class diagram** on GitHub. We will also update the latest version there.

The following picture shows our database scheme generated by MySQL-Workbench.

database scheme

Both diagrams are added to our **Software Architecture Document**.

Have a nice evening,

your CookieBook-Team

Hello dear MyCookieBook team!

Your blog entry looks very nice. You did a great job!

We think it's great that you didn't draw the diagrams but generated them. This will certainly save you a lot of work!

Your database structure looks well thought out. We did not notice any inconsistencies in it!

We wish you much success,
your SimpleSurvey team

Hey SimpleSurvey-team,
thanks a lot for your feedback.
We had the same thought, why drawing the diagram when we can generate it. It was so much easier.
Thanks a lot for checking our database.

Stay safe,
your MyCookieBook team

Dear MyCookieBook team,

We really enjoy your blog post. We like that you put your links under your technical terms. In addition you described your doing, shortly and understandable. Also you explained how you gained those graphics, this can help others when they have problems with something. It is helpful, that you can generate your diagrams from your code and it will update itself.

Your class diagram looks right. There are many arrows but with multiple pages you need them there in that diagram.

We like your database scheme, you can easily understand it with a closer look. In addition we enjoy your names you gave your tables and fields in your database.

We hope you are all healthy.
Have a nice day.
Sincerely COT-Team
